Field composition and research content contrasts

Research-doctorate works

Identified NIDA/NIAAA funding connection: advisor/committee or individual award association

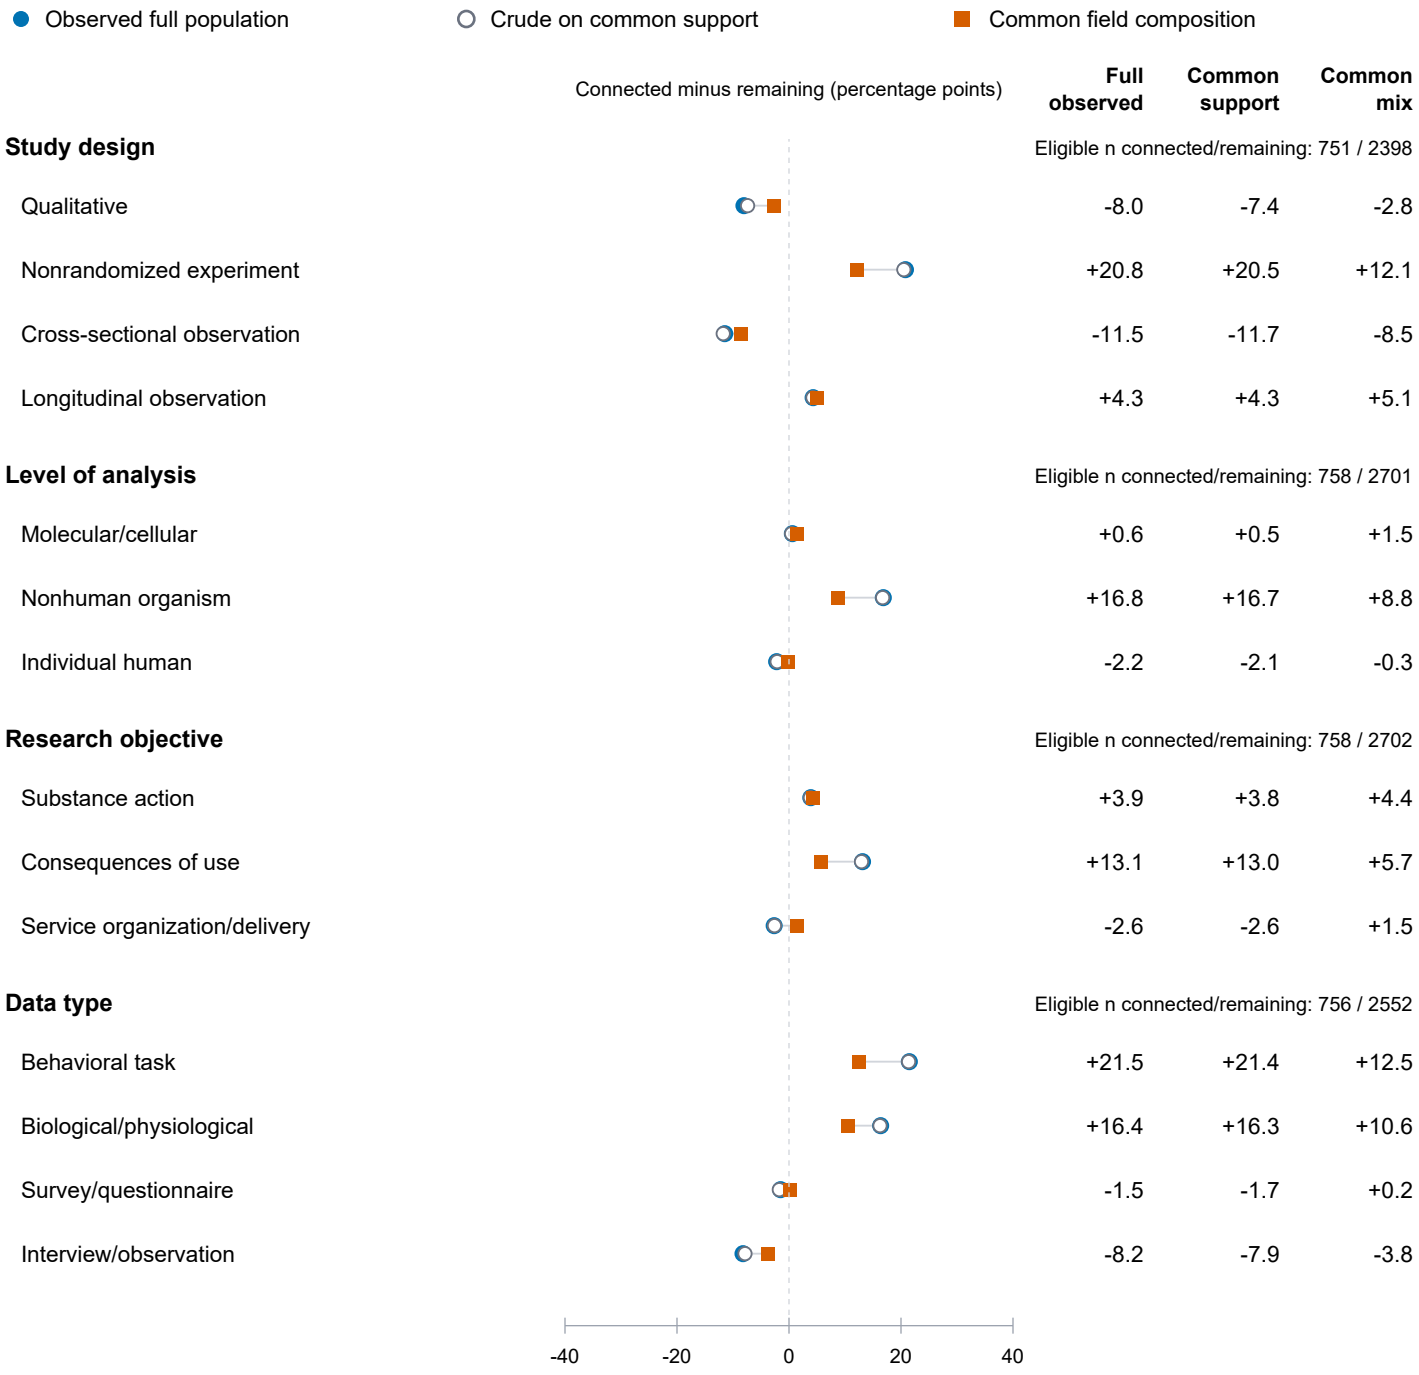

Common composition applies the same pooled eligible field weights to both groups within each outcome and degree. Support shows the crude contrast restricted to fields with both groups. Field-unavailable works remain a separate stratum. All contrasts are descriptive; no inferential intervals are shown. Lines join alternative summaries and are not intervals. C8 forms overlap. All twelve field strata have both groups for every outcome; retained eligible coverage is 100%.

Field composition and research content contrasts

Master's works

Identified NIDA/NIAAA funding connection: advisor/committee or individual award association

	Full observed	Common support	Common mix
Study design	Eligible n connected/remaining: 751 / 2398		
Qualitative	-8.0	-7.4	-2.8
Nonrandomized experiment	+20.8	+20.5	+12.1
Cross-sectional observation	-11.5	-11.7	-8.5
Longitudinal observation	+4.3	+4.3	+5.1
Level of analysis	Eligible n connected/remaining: 758 / 2701		
Molecular/cellular	+0.6	+0.5	+1.5
Nonhuman organism	+16.8	+16.7	+8.8
Individual human	-2.2	-2.1	-0.3
Research objective	Eligible n connected/remaining: 758 / 2702		
Substance action	+3.9	+3.8	+4.4
Consequences of use	+13.1	+13.0	+5.7
Service organization/delivery	-2.6	-2.6	+1.5
Data type	Eligible n connected/remaining: 756 / 2552		
Behavioral task	+21.5	+21.4	+12.5
Biological/physiological	+16.4	+16.3	+10.6
Survey/questionnaire	-1.5	-1.7	+0.2
Interview/observation	-8.2	-7.9	-3.8

Common composition applies the same pooled eligible field weights to both groups within each outcome and degree. Support shows the crude contrast restricted to fields with both groups. Field-unavailable works remain a separate stratum. All contrasts are descriptive; no inferential intervals are shown. Lines join alternative summaries and are not intervals. C8 forms overlap. Education has no connected works and is omitted from common support. Retained eligible coverage: C3 99.0%, C4 99.0%, C5 99.0%, C8 99.0%.
